About us

This hospital was established in 1994 with the clear vision to render whole hearted service in the field of health care to the poor, sick and the suffering humanity. This healing ministry being the prime motto of the congregation, the words of Jesus "as long as you did to the least of my brethren you did it to me", meaning thereby whatsoever good you do the needy specially ailing humanity – you do it for God Himself, we move ahead to treat & heal.

St. Joseph's hospital is owned and managed by Medical Sisters of St. Joseph, a congregation of Christian women, committed and dedicated to the healing ministry with a firm conviction that "We treat and God heals" was founded in Kerala in the year 1944. This hospital today has a capacity of 180 beds, an ICU both medical and surgical, five operation theatres, dialysis unit, and speciality specific OPD block. To provide better and affordable treatment this hospital can boast of having modern and latest technological infrastructure, blood bank and component and other diagnostic services such as pathology, X-ray, ultrasound 2D echo, EEG, NCV and EMG units among other things. This hospital has well furnished general wards, private rooms, deluxe and super deluxe rooms, parking slot, security services, CCTV, fire fighting system, pollution free environment with clean and green campus. We have also 24 hour's emergency services, pathology, pharmacy and billing. In our commitment to provide quality service and patient satisfaction, the Medical Sisters of St. Joseph's, having a chain of hospitals in many parts of India.

ICU

The ICU with 18 beds both medical and surgical meeting all standards has been set up with modern facilities like invasive and non-invasive ventilator support, fully equipped with central O₂ system,

ABG and bedside dialysis facilities. The ICUs are manned round the clock by critical care consultants, dedicated nursing staff and technicians with specialized qualification, experience and training in critical care services.

Surgery Department

St. Joseph's Hospital's Surgery Department has some of the most well-known surgeons. The unit is proud of having well-experienced technicians with ongoing update training in open and laparoscopic surgery who are committed to provide ethical and evidence-based surgical options to patients. The Department is equipped with high

definition laparoscopic instruments and provides a wide variety of open and laparoscopic procedures for abdominal surgeries related to gallbladder, appendix, uterus and various types of hernias etc. Surgeries related to neurology, paediatric, urology, obst. & gynae., eye, ortho and plastic surgery are being done in the operation theatre.

Pathology & Blood Bank

The Department of pathology and blood bank with components at St. Joseph's Hospital has most advanced procedures in diagnostic services. The pathology includes various departments like Hematology, Bio-Chemistry, Serology, Microbiology, Cytology, Histopathology And Blood Bank. The Department of transfusion medicine (Blood Bank) provides leuko-

depleted RBC, platelet concentrate, fresh frozen plasma and cryoprecipitate. The aim of the department is to promote use of various components to ensure optimum utilization of blood and also to ensure that the patient receives the safest possible blood by testing for various markers by well-qualified personnel in the subject.

Radiology & Imaging

The Department of Radiology and Imaging aims to ensure quality procedures, reporting and instant

availability to patients. In order to deliver the most efficient and precise diagnostic services, St. Joseph's Hospital has put in place the latest and cutting-edge technology and infrastructure. The Department offers services like digital X-Ray, Ultrasound, Colour Doppler, 2D Echo, ECG, EEG, EMG, NCV with excellent viewing quality for accurate reporting and diagnosis.

Dialysis

Department of dialysis is fully equipped with four latest haemodialysis machines, and qualified and experienced staff.

Physiotherapy

laser therapy, UST and traction units. Here we treat all kinds of patients with neurological and orthopaedic ailments even for post natal care and obesity related ailments. We have an unit of neuro development techniques to treat cerebral palsy (CP) child, mentally retarded children and patients with muscular dystrophy.

The physiotherapy department is fully equipped with modern modalities like short wave diathermy, inter ferential therapy,

Pharmacy

Department of pharmacy provides medicines, medical supplies and essential surgical items to the patients of St. Joseph's Hospital for both out patients as well as inpatients. The staff serving in this department are professionally qualified and trained. Patients are treated with respect and care.

Pastoral Care & Counselling

Pastoral care is a model of emotional and spiritual support to the patients and their families to cope with the ailments and treatment to get total

healing. Regular visits to all the admitted patients to listen, to render support, to feel encouraged are done. Special prayers are offered both prior to and after the surgeries for patients.

Social Work Department

The department of social work focuses on social, psychological and economic aspects in order to assist them with proper guidance and support in the hospital. Awareness programs are conducted at different intervals for the staff and patients on various health related topics. Free medical camps and outreach

programs in different localities and schools are being conducted. Community development project is a recent effort to bring changes among the less privileged and marginalised. A tailoring class centre is started where adolescent girls and women who are economically poor to assist them to be self reliant in the community.

Conclusion

With grateful hearts being raised to God by all of us, we affirm that the hospital functions smoothly with a band of dedicated doctors, nursing, paramedical and other supporting

staff, with the co-operation of the people, we continue to treat the sick and suffering, leaving God to heal and bring wholeness to the human lives.
